CAREER OBJECTIVE

Computer science undergraduate focusing on AI & ML and actively learning full-stack development (MERN stack). Practising data structures & algorithms in C++ and building hands-on web projects. Looking for a frontend/backend or Software Intern role to learn from production teams and apply my skills to real problems.

SKILLS

Programming Languages: Python, C, C++

Frontend: HTML5, CSS3, JavaScript, React.js, Tailwind CSS

Backend (Learning): Node.js, Express.js, REST APIs

Databases: MySQL, Firebase

Libraries & Tools: Axios, Chart.js, NumPy, Pandas, Matplotlib

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab

Core Concepts: Data Structures & Algorithms, OOPs, API Integration

PROJECTS

CryptoTracker Real-time Cryptocurrency Tracker Live

Developed a high-performance **React.js** web application to track **500+ cryptocurrencies** with real-time market data.

Integrated **CoinGecko API** using **Axios** to fetch dynamic data, including price, market cap, and 24-hour fluctuations.

Implemented **global state management** using **Redux Toolkit**, ensuring efficient data flow and minimizing unnecessary re-renders.

Designed a **responsive, mobile-first UI** using **Tailwind CSS**, enhancing accessibility across devices.

Built **interactive data visualisations** using **Chart.js** for historical trend analysis (24h, 7d, 30d).

Optimised performance through efficient API handling and component structuring, improving rendering efficiency.

Smart Water Automation and Dosing System

- Developed an **IoT-based automation system** integrating **ESP32** and **Python** for real-time monitoring and control.
- Designed a **web-based dashboard** enabling real-time monitoring, control, and **data visualization**.
- Implemented automated decision-making logic for chemical dosing using real-time sensor inputs.
- Achieved **patent publication in Indian Patent Journal (Feb 2026)**.

Travel In-Depth Sustainable Travel Guide Website

- Developed a responsive travel platform providing structured destination insights including culture, attractions, and sustainability practices.
- Integrated eco-friendly travel recommendations to promote responsible tourism.
- Built using **HTML, CSS, JavaScript** with scalable and modular frontend architecture.
- Improved user experience through intuitive navigation and responsive UI design.

EDUCATION

Pranveer Singh Institute of Technology, Kanpur

Aug.2024–May2028(Expected)

Bachelor of Technology in Computer Science (AI&ML).

Kanpur,UP

Coursework: Data Structures and Algorithms (DSA), AI & ML Foundations, Computer Architecture, SQL, Web Development.

Patent: App No: 202511131860 A IoT-based Automatic Water Quality Monitoring and Dosing System.

Technical Profile: Building full-stack applications using the MERN stack with GSAP and Framer Motion.

ACHIEVEMENTS & CERTIFICATIONS

- **Problem Solving:** Solved **170+ DSA problems** on LeetCode.
- **Technical Workshop:** Attended workshop at **IIT Kanpur** on emerging technologies and applications.
- **Certifications:** Infosys Springboard HTML, CSS, JavaScript, Python | Learning **Full Stack (Node.js, Express)**
- **PROTECH 2K25:** Presented **Travel In-Depth** project at PSIT.
